

Neewer® Portable and Functional Aluminum Alloy Camera Stabilizer Handheld Steady Cam Video Stabilizer Motion Stead Cam for DSLR Camera

As a photographer who always takes photos videos during events or occasions, a camera stabilizer is needed because you cannot hold the cameras steadily with your hands for hours. Neewer® has designed a camera stabilizer which is suitable for many types of cameras as well as with a professional looking.

Features:

- It is designed with aluminum alloy which is lighter and portable in all places.
- With the professional design and construction of 360 degree all around stable shooting, along with less motion and shake hand-held stabilizers, Neewer camera stabilizer makes you easy to operate, with lightweight which has precise adjustments and support a wide range.
- It is great for indie film makers who are looking forward to moving their films to the next level.
- The Gimbal can be adjusted to lose or tight the way you want.
- It has a metal socket which is light and durable and will hold a balance for your camera perfectly.
