Introduction:

Nowadays all the home appliances can be controlled by a remote control, like TV, DVD, COOLER, SPEAKERS, even the refrigerator is also digitalized. But how about the computer? Is it only controlled by input equipment as a mouse or a keyboard? No, Multifunctional Computer Remote Control will change this kind of traditional operation way and will make you feel the fresh experience. You can be far from the screen, the keyboard and the mouse, but can be sit on the sofa or bed and enjoy the conformability. Users can make computer operations freely, like listening to music, watching a movie, sound volume adjustment, mute, channel or photo selection, turn the computer off and much more.

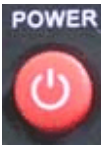

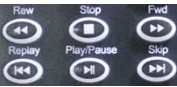

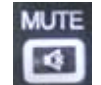

The Computer Remote Control (P-01RN) involves the general Window® desktop functions and Window® media center remote control functions. It will work properly even it's not in the media center.
