## Quick Reference Guide

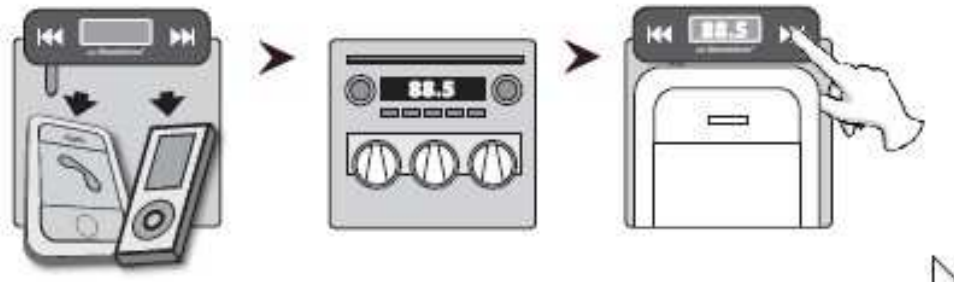

Illustration 1

### **CHARGING:**

Connect the FM transmitter to the delivered USB cable. Connect the other end of the USB cable to your laptop/computer or any other USB charging device. Charging time lasts approximately 5 hours.

### **OPERATION**

*See illustration 1*

1. Switch the ON/OFF switch on top to the ON position. The FM Transmitter is now switched ON.
2. Connect the FM Transmitter to the 3.5 mm jack audio socket of your audio device. Set the volume of the audio device to the maximum setting.
3. Adjust the volume of the car radio and select a free and clear FM frequency (please avoid the transmission points of roadcasting stations).
4. Press the “I<<“ or “>>I” button to set the FM Transmitter to the same frequency.
5. Play your music and enjoy it.

Note: If the FM signal is interrupted, please set the frequency of the car radio and the FM Transmitter to another clear frequency.

1 x USB Cable
